3. Installation for USB printer driver

To print with the Tactonom Tactile Printer, install the driver and software first.

Supported OS: Windows[®] 7/8.1/10

- 1 Install the application software for USB printer driver. Use the USB stick supplied for this purpose and connect it to your PC.
- 2 Install the USB printer driver.

4. Tactile Paper

- 1 Open the paper feed tray and paper discharge tray.
- 2 Insert the Tactile Paper sheet in the paper feed tray. Only place one sheet at a time.

Note 1: Set the side with the smooth texture facing up.

Note 2: Insert only one sheet of Tactile Paper.

Note 3: Close the paper feed tray before closing the lid.

Note 4: Only original Tactile Paper may be used. Any other paper may damage the device.

5. Printing

Start of printing

- 1 Select „Easy Tactix“ in the list of printers on Print menu.
- 2 Start to print

Caution: Do not pull out the Tactile Paper sheet during printing. This may damage the printer.
